WORK EXPERIENCE

03/05/2023 – 02/04/2024 Australia

SOFTWARE DEVELOPER JRMclix (Remote)

- Design, develop, and maintain software solutions across various platforms, ensuring robust and scalable code.
- Collaborate with cross-functional teams, including designers, product managers, and other developers, to define and implement innovative software features.
- Write clean, efficient, and maintainable code following industry best practices and coding standards.
- Conduct software testing (unit testing, integration testing) to identify and fix bugs, ensuring high-quality code releases.
- Optimize application performance by improving algorithms and database queries to ensure smooth user experiences.
- Develop and maintain APIs for seamless integration between front-end and back-end systems.
- Perform code reviews and provide constructive feedback to team members, promoting coding quality and team growth.
- Work in an agile development environment, participating in sprint planning, daily stand-ups, and retrospective meetings.
- Troubleshoot, debug, and upgrade existing software to maintain smooth operation and meet user requirements.
- Stay up to date with emerging technologies and best practices to continuously improve development processes and tools.
- Document development processes and maintain software documentation to support future enhancements and maintenance.
- Implement security best practices and ensure that all software developed adheres to security standards.

03/01/2023 – 03/10/2022 Kabul, Afghanistan

SOFTWARE DEVELOPER Independent Administrative Reform and Civil Service

- Develop and maintain responsive web applications using HTML, XHTML, CSS, Tailwind CSS, and Bootstrap 5 to ensure cross-browser compatibility and mobile responsiveness.
- Build dynamic and interactive front-end components using JavaScript, jQuery, Vue.js, and React.js, creating seamless user interfaces and improving user experience.
- Collaborate with back-end developers to integrate front-end interfaces with databases, using RESTful APIs for efficient data retrieval and management.
- Optimize database performance using MySQL, SQLite, SQL Server, MariaDB, PostgreSQL, and MongoDB, ensuring data integrity and scalability.
- Implement real-time database solutions using Firebase to enhance the functionality of web applications, providing live updates and push notifications.
- Design and develop reusable UI components using modern JavaScript frameworks such as React.js and Vue.js, increasing code efficiency and maintainability.
- Ensure security best practices by implementing secure authentication systems and data protection measures when working with sensitive information in both SQL and NoSQL databases.
- Write efficient and optimized SQL queries for data manipulation and retrieval in relational databases like MySQL, SQL Server, PostgreSQL, and MariaDB.
- Maintain version control using Git, collaborating with team members to manage code changes and resolve conflicts in distributed development environments.
- Troubleshoot and debug code for both front-end and back-end systems, identifying and resolving issues to ensure smooth user interaction and functionality.
- Monitor and improve application performance, focusing on reducing page load times and ensuring smooth transitions in dynamic single-page applications (SPAs).
- Collaborate with UI/UX designers to implement visually appealing and user-friendly designs, ensuring accessibility and adherence to best design practices.

01/01/2017 – 30/12/2020 Kabul, Afghanistan

WEB DEVELOPER Code Zone ICT Solutions

- Design, develop, and maintain responsive websites using HTML, CSS, JavaScript, and front-end frameworks like Bootstrap, Tailwind, React, and Vue.js.
- Collaborate with designers and back-end developers to create seamless and efficient user experiences, ensuring consistent design and functionality across all platforms.
- Implement and maintain content management systems (CMS) such as WordPress, Drupal, or Joomla, customizing themes and plugins as required.
- Optimize website performance by ensuring fast load times, improving SEO, and applying best practices for web performance (e.g., image compression, code minification).
- Ensure cross-browser compatibility and mobile responsiveness for all developed websites and web applications.

- Create and integrate RESTful APIs to communicate between front-end and back-end systems, ensuring smooth functionality.
- Perform website testing and debugging across multiple browsers and devices, resolving any issues to ensure functionality and performance.
- Develop and implement security measures to protect websites from vulnerabilities and threats such as cross-site scripting (XSS) and SQL injection.
- Manage and maintain website hosting environments, performing updates and monitoring performance to ensure high availability and reliability.
- Write clean, scalable, and maintainable code in adherence to industry standards and best practices for web development.
- Stay current with emerging web technologies and trends, implementing new techniques and tools to improve website functionality and user experience.
- Collaborate in an Agile development environment, participating in sprint planning, daily stand-ups, and collaborative work with cross-functional teams.
- Implement and manage SEO best practices to ensure websites rank highly in search engine results, using tools such as Google Analytics and Search Console.
- Work with version control systems like Git to manage code and collaborate effectively with team members on projects.
-

30/1/2023 _ current Kabul, Afghanistan

WEB DEVELOPER Administration office of president (AOP)

- Engineered mobile-friendly and responsive web platforms using HTML, XHTML, CSS3, Tailwind CSS, and Bootstrap 5 to support cross-device compatibility and consistent user experience.
- Created interactive and data-driven front-end components utilizing Vue.js, React.js, JavaScript, and jQuery to enhance user engagement and functionality.
- Partnered with back-end teams to connect front-end interfaces with server-side logic via RESTful APIs, streamlining data exchange and improving system performance.
- Maintained and optimized multiple database systems including MySQL, SQL Server, PostgreSQL, MariaDB, SQLite, and MongoDB for high availability and data accuracy.
- Integrated Firebase for real-time updates, enabling live notifications and synchronization across distributed systems.
- Developed modular and reusable UI elements with modern front-end frameworks, contributing to cleaner code architecture and faster development cycles.
- Ensured application security by applying authentication systems, access control mechanisms, and data encryption techniques for both SQL and NoSQL environments.
- Crafted high-performance SQL queries for efficient data processing and retrieval across various relational database systems.
- Utilized Git for source control, actively collaborating with development teams to manage code repositories, perform pull requests, and resolve integration conflicts.
- Diagnosed and resolved bugs across full-stack applications to maintain seamless application behavior and user satisfaction.
- Conducted performance tuning and page speed optimizations to improve load times and enhance the responsiveness of single-page applications (SPAs).
- Worked with UI/UX designers to translate design concepts into functional interfaces, ensuring usability, accessibility, and consistency with AOP's digital standards.

SKILLS

Front-end: HTML | XHTML | CSS | Tailwind CSS | Bootstrap 5 | JavaScript | jQuery | Vue.js | React.js.

Back-end: PHP | Laravel | CodeIgniter | Python | Django.

Database and (DBMS): MySQL | SQLite | SQL Server | MariaDB | PostgreSQL | MongoDB

CMS: WordPress.

SEO: On-Page | Off-Page | Technical SEO | User Experience (UX) | Backlink | Local SEO | Mobile SEO.

Tools: GIT | GitHub | GitLab | MySQL Workbench | Postman | Docker | SEMrush | Google Search Console | Google Analytics.

Programming Languages and Frameworks (Familiar, Not Currently in Use): C++ | Java | C# | Python | React Native.

Personal Skills: Time management | Creativity and Planning | Team leader | Problem Solving | Accuracy | Adaptability

PROJECTS

Edtech e-learning portal

<https://edtecheqra.com/front>

<https://sca.edtecheqra.com/>

- Developed the **Swedish Committee for Afghanistan (SCA) E-Learning Portal** using the **Laravel PHP framework** for both frontend and backend.
- Built a fully responsive platform with a user-friendly interface.
- **Technologies/Skills:** Laravel, MySQL, JavaScript/jQuery, HTML/CSS, APIs, Git, GitHub, SEO .

Barya Tech Website

<https://baryatech.com/>

- Designed and developed the corporate website for **Barya Tech IT Services & Solutions**.
- Created a modern, responsive, and user-friendly WordPress website.
- **Technologies/Skills:** WordPress HTML/CSS, Git, GitHub, SEO.
- SEO optimization

Afzon e-commerce

<https://afzon.af/>

- Developed a full-featured **online marketplace** for buying and selling products, enabling seamless user experience for both customers and sellers.
- Implemented product listings, shopping cart, payment integration, and responsive design for mobile and desktop devices.
- Focused on **SEO optimization** to improve search engine visibility and attract more users.
- **Technologies/Skills:** WordPress, HTML/CSS, Git, GitHub, SEO

E-tendering, AGEOPS (Pronounced as /'eidʒəps/) <https://ageops.af>

<https://tenders.ageops.af>

- **Afghanistan Government Electronic and Open Procurement System (AGEOPS)**
AGEOPS is the official **Electronic Government Procurement (eGP) system** for public procurement in Afghanistan. Upon successful implementation, the entire public procurement process—from planning to project closeout—will be conducted electronically.
- Currently, public procurement in Afghanistan handles approximately **4,000 projects per year** with a total value of **\$2.5 billion USD**. AGEOPS comprises **17 business modules** and **10 operational modules** to manage this process efficiently.
- **Technologies Used:** PHP, Node.js, MariaDB, CentOS, Angular, React.js, Laravel, AWS, MongoDB, Git, GitLab, PHPStorm, Ubuntu.
- **Afghanistan National Procurement Website**
- <https://npa.gov.af/>
- The official website of the **National Procurement Directorate (NPD)**, part of the **National Procurement Authority (NPA)**, serves as the central hub for Afghanistan's public procurement activities. Established in 2014 under the Administrative Office of the President, the NPA aims to enhance transparency, efficiency, and accountability in the procurement system.

- **Information Management System – Lawyers**

- 🔗 <http://gdcma.aop.gov.af/>

- Developed a municipal information system to record and manage data of transit attorneys, including contact details, duties, and activities.
 - Improved coordination between government institutions and attorneys, enhancing transparency and service delivery.
 - **Technologies/Skills:** Laravel, MySQL, Bootstrap, JavaScript, ajax.

- Administrative of President Office (AOP):

- <https://aop.gov.af/dr>

- **E-Recruitment System**

- 🔗 <http://e-recruitment.aop.gov.af/>

- Developed an online government recruitment system enabling applicants to register, upload documents, and track progress digitally.
 - Automated application review, shortlisting, and result publishing to ensure transparency and equal opportunities.
 - **Technologies/Skills:** Laravel, MySQL, Vue.js, REST API, Bootstrap
